

POST-BACCALAUREATE PREMEDICAL PROGRAM

<https://krieger.jhu.edu/postbac/>

The **Johns Hopkins Post-Baccalaureate Premedical Program** prepares students for a career as a physician through world-renowned science education, outstanding medical tutorial opportunities, and extensive advising.

Designed for students who have not yet completed the premedical prerequisite coursework, our program includes courses that combine science coursework with practical applications to prepare students for medical school, while medical tutorials offer students exceptional clinical and research experiences with faculty from the Johns Hopkins School of Medicine. Then, with access to a comprehensive year-long advising course as well as individual advising, students are able to develop a successful, individualized, premedical application strategy and timeline that best meets their unique needs.

Programs

- Pre-medicine, Post Baccalaureate Certificate (<https://e-catalogue.jhu.edu/arts-sciences/full-time-residential-programs/degree-programs/Post-baccalaureate-premedical-program/pre-medicine-pbc/>)
